Advantages

SuperVision mc² ensures premium, state-of-the-art banknote detection.

Ergonomic, vertical banknote feeding and the compact desk space saving design are outstanding characteristics.

SuperVision mc² is the simplest banknote detector on the market to operate due to the highly appraised display menu and multifunction button based user interface.

It is equipped with a future oriented detection technology. The machine is very easy to upgrade when new banknotes are issued or if you want to change the installed currency mix.

Warranty

12 months against all defects in material and labour.

Benefits

SuperVision mc² saves time and money by requiring practically no training of the users and due to the simple and fast operation.

No need to select currency; SuperVision mc² will do it for you.

No need to turn the notes in identical orientations; SuperVision mc² will handle all four orientations.

No need to doubt the genuineness of banknotes; SuperVision mc² will fast and easily give you the answer.

The proven build quality will ensure many years of flawless operation.

Approvals

RoHS compliant, FCC approved and CE marked.

Multifunction button and graphic display provides convenient menu-based-operation. The operation is very logical.

Well designed stacker pocket ensures orderly stacked banknotes that are very easy to collect when the job is done.
